

LAUREESH VOLMAR

Software Development Intern | Backend & Web Applications

Lawrenceville, Georgia | (678) 755-9200

laureesh1@gmail.com | [linkedin.com/in/laureesh](https://www.linkedin.com/in/laureesh) | github.com/Laureesh

SUMMARY

Motivated IT student specializing in backend and web development with strong skills in Java, MySQL, and cloud technologies. Experienced collaborating on Agile team projects and delivering secure, efficient applications using SDLC best practices.

EDUCATION

Georgia Gwinnett College, School of Science & Technology

May 2027

Bachelor of Science in Information Technology (Software Development)

GPA: 3.92/4.00

Relevant Coursework: Software Development, Web Development, Cloud Computing, Data Structures, Object-Oriented Programming, Database Management, Computer Networks

EXPERIENCE

Certified Medication Aide, Northridge Health & Rehabilitation

July 2023 - March 2025

- Administered 100+ daily medication doses with zero documentation errors, ensuring patient safety and compliance. Collaborated with 5 healthcare professionals to improve daily workflow efficiency by 20%.

Amazon, Fulfillment Center Warehouse Associate

June 2021 - August 2022

- Processed 1,200+ customer orders weekly, exceeding daily productivity goals by 10% through accuracy and workflow efficiency.

CERTIFICATIONS

- [Certiport - Information Technology Specialist in Networking](#)**

November 2024

ACADEMIC PROJECTS

Text-Based Adventure Game — MySQL, Java, VS Code

August 2025 - December 2025

- Collaborated in a 4-person Agile team to develop a Java-based client simulation using MySQL for data persistence. Implemented functional requirements for navigation, inventory, combat, and database integration through the SDLC process.

Personal Portfolio Website (HTML, CSS, JavaScript, GitHub Pages)

March 2024 - June 2024

- Built and deployed a responsive personal portfolio using HTML, CSS, and JavaScript. Integrated GitHub Pages hosting, custom form submission (Formspree), and SEO metadata for better visibility.

Network Security Simulation (Cisco Packet Tracer)

August 2024 - December 2024

- Designed and simulated a secure multi-router business network using Cisco Packet Tracer, configuring VLANs, ACLs, and firewalls to enhance security and segmentation.
